

CASHTRONIC®MVX 1-WAY

63mm 90mm 110mm

CASHTRONIC®MVX transports safely and fast to a low cost. Based on a customer's needs we design a system, which easily can be integrated in a store environment.

CASHTRONIC®MVX is a microprocessor controlled system. Main Control Unit has a multi-language display that shows all system information in clear text.

CASHTRONIC®MVX has wide choice of stations for different store layouts. Stations are operated with help of LED signals and different types of panels. Stations can work both in manual and automatic mode.

CASHTRONIC®MVX stations can have customer adjusted design and solutions. For example light cubes, cable conduits and etc.

CASHTRONIC®MVX has 4 access levels to secure pneumatic tube system settings from unauthorized persons, which excludes errors in the system.
